LA HABRA, California - July 18, 2016 - Vip Rubber and Plastic Company (Vip) announced today it has acquired the **plastic pipe division** of the Placentia, California-based plastic extrusion company, Excalibur Extrusions.

“We are so excited to welcome Excalibur, and its 40+ years of experience and proven success, to our team,” said Howard Vipperman, President of Vip. “We already extrude rubber and plastic, mold rubber and produce rubber sheet, so the addition of plastic pipe to our capabilities gives our customers an even wider scope of custom options.”

Both companies have established longevity and over 95 years of experience combined. Vip boasts over 55 years in manufacturing and Excalibur has over 40.

Established in 1961, Vip is a full-service, custom manufacturer of rubber and plastic products. Family-owned and operated, VIP has repeatedly presented as a leader in the industry. President, Howard Vipperman, currently leads a team of over 150 sales, service, technical and manufacturing staff with the collective vision of putting the customer first, and providing the top-quality products they need to be successful.

VIP meets all **AS-9100** and **ISO 9001** requirements and is continually improving processes to reduce waste and rejections, while staying competitive in the world market. Consistent evaluation and evolution has allowed VIP to maintain its position as a top manufacturer. The facility is also **Boeing Approved**.

- Vip acquires Excalibur Extrusions, effective July 18th, 2016
- Vip will add Excalibur’s plastic pipe division to it’s existing capabilities
- Excalibur customers will receive the same quality product they are used to
- This combination brings together 95 years of total manufacturing experience
- Excalibur customers can call the VIP main line for assistance 562.905.3564
